

Quality Policy

Northern Micro is committed to delivering the ultimate customer satisfaction by providing Reliable, Innovative and Flexible computing solutions and by continuously improving our product and service offerings to our customers, partners, suppliers and other interested parties. We provide the leadership to manage the policy and communicate it throughout our organization. Our system complies with all legal requirements and is driven by the quality objectives defined by Management. The system is planned, implemented, and reviewed while considering the context of our organization.

Environmental Policy

Northern Micro is committed to continually reducing the amount of Pollution created in its manufacturing plant by offering recycling solutions for IT equipment and by properly reducing, reusing and recycling its packaging material while considering the interests of our customers, partners, suppliers and other interested parties. We provide the leadership to manage the policy and communicate it throughout our organization. Our system complies with all legal requirements and is driven by the environmental objectives defined by Management. The system is planned, implemented and reviewed while considering the context of our organization. Greenhouse Gas Net Zero by 2045 with a 50% reduction on scopes 1 and 2 by 2030 and a 100% reduction on scopes 1 and 2 by 2035. Northern Micro maintains an Environmental Management system that it is proud of!
